Interests

Reading books
Playing basketball

Work Experience

Software Developer | [ITS](#) | Aug'2020 – Present

- Full stack developer on an agile team building and integrating new features onto a complex SaaS platform for business travel.
- Involved in every stage of development from grooming and planning to development, QA and deployment.
- Worked closely with UX team to optimize frontend experience and performance.
- Reduced site load time minifying image sizes and adding them to S3 bucket and rewriting react class based components to functional components.
- Implemented Internationalization, localization and currency formatting.
- Worked on fixing production critical bugs and created code documentation.

Skills

Javascript
