EXPERIENCE

-> INTERNET TRAVEL SERVICES [TSIUSA] [SOFTWARE ENGINEER] [AUG-2020 - PRESENT]
- Implemented ReactJs library to revamp pages into functional components.
- Worked on performance issues such as site load time by minifying images and adding them to S3 bucket and refactoring the codebase. Reduced homepage load time from 40 seconds to 0.9 seconds.
- Implemented internationalization, currency formatting and currency conversions.
- Worked on fixing production critical bugs and created code documentation.

-> FREELANCER [JAN-2020 - JULY-2020]
- Created book saving app for a local bookstore.
- Worked with a start up to revamp their pages into ReactJs.

SKILLS/TECHNOLOGIES:

REACTJS, REACT-NATIVE, NEXTJS, VUEJS, JAVASCRIPT, JQUERY, MONGODB, NODEJS, EXPRESSJS, MONGOOSE, BOOTSTRAP, TAILWINDCSS, BULMA, MATERIALUI, GIT, GITHUB, TFS, NETLIFY, HEROKU

PROJECTS

- **Bookstore Storage Webapp**

  This web app was a freelance project created for a bookshop to keep track of the number of books.

- **SmappCare - Personal Project**

  This project was my first android app created using React-Native, NodeJs and MongoDB, the purpose of this app was to store prescriptions, add medicinal reminders and show COVID-19 cases.

- **Detection of Parkinson's disease using Deep learning algorithms (CNN)**

  This was the final year project at university, the goal was to detect early Parkinson's symptoms using patient's FMRI images. The images had to be passed through our CNN, we passed images through VGG-16 CNN model to test and check the accuracy.

CERTIFICATIONS

- LINUX SERVER MANAGEMENT AND SECURITY (COURSERA)

- WEB DEVELOPMENT BOOTCAMP MERN-STACK (UDEMY)

EDUCATION

Islamic University of Science and Technology — BTECH CSE-2019(6.28 CGPA)

OTHER SKILLS

Adobe Photoshop, llustrator, Lightroom, XD, Figma, Graphic Design, Logo Design, Branding UI-Design, Linux, Windows, MacOS, Agile.
